

AMENDMENTS TO THE SPECIFICATION

Please make the following amendments to the specification.

Please delete paragraph 00038 and replace it with the following:

[00038] First column 46 has a first lifter 89 for raising and lowering ventilation unit 24 from and to the room floor. The first lifter 89 has a first driver (not shown) mounted within housing 54. The first lifter 89 also has a pair of vertically extending arms 90 (see Figs. 3-4) operable to extend and retract from housing 54 in response to operation of the first driver. The first driver is in turn operable by an input control 86 (see Figs. 1-9) which is attached to the housing 54. Control 86 may include a single control button, several control buttons, a toggle switch, or the like for controlling operation of the first driver and thus extension and retraction of arms 90

Please delete paragraph 00044 and replace it with the following:

[00044] Second column 48 has a second lifter 91 for raising and lowering IV unit 28 off of and onto ventilation unit 24. Similar to the first lifter 89, the second lifter 91 has a second driver (not shown) mounted within housing 55. The second lifter 91 also has a pair of vertically extending arms 134 (see Figs. 7-8) operable to extend and retract from housing 55 in response to operation of the driver. The second driver is, in turn, operable by an input control 132 (see Figs. 1-9) which is attached to housing 55. Control 132 may include a single control button, several control buttons, a toggle switch, or the like for controlling operation of the driver and thus extension and retraction of arms 134.
